Setting up the environment

Create a folder with a suitable name

Place these files in the same folder:
1. RPA.py
2. config.py
3. Book_master.xlsx
4. secret_key.json
5. file+date..xlsx

configure the config.py according to your credentials:
set **Sharepoint username** against **sp_user**
set **Sharepoint** acount **password** against **sp_password**

To setup the **google sheets** follow the instructions **'Configration for Google Sheets.pdf'**

To schedule the script follow the instructions in **'Scheduling the Scripts.pdf'**

Setting up the Python Environment
commands to install required python modules:
pip install gspread
